About the Journey

**UNLEASH YOUR LEADERSHIP
AND BE UNSTOPPABLE**

We have developed deep learning and transformational experiences where each individual immerses in this unique learning journey and emerges as a powerful, purposeful and transformed leader.

The Being Centred Leader operates from the space of their Being (one's true self), rather than the ego. This requires the leader to have the capacity to look within first, to discern where they are operating from, and if they are in their state of Ego, consciously shift into their Being.

Impact of the workshop

01 This workshop will **enhance your capabilities** to get really clear about who you are, and will enable you to **expand your perspectives**, learn the key tenets of collaboration, develop your self-awareness as a leader and **bring alive the potential** you see around you in people and in the world.

02 It will free you from what is holding you back, **enable you to have breakthroughs** in areas that you hadn't looked before and **build your muscle in dealing with conflicts and breakdowns.**

03 You will also find that your intuitive capacity , self-awareness and connectedness to others will be enhanced and will **bring through new capabilities, an ability to build relationships like never before.**

Impact of the workshop

- 04 You will **discover your life's true Purpose**, which when aligned to the work you do in the world, provides a sense of deep fulfilment.
- 05 You will focus on building your leadership muscles further with the new framework of **Being centred leadership**.
- 06 You will heighten your awareness of how you can **dance from your ego into the state of your Being** & respond to life rather than react.
- 07 You will **go beyond your limits** & expand your capacity to be unstoppable.

The Design

BRINGING FORTH THE POWER OF THE BEING

The core of this journey is to enable each leader to experience their Being and operate from this new space, discover the true purpose of their life, and align their work to this purpose, with an assured sense of fulfilment.

We do this through;

**Experiential and
interactive sessions**

**Role plays,
simulations**

**Transformational exercises
and contemplative sojourns**

**Mentoring
and Coaching**

**Case discussions
and analysis**

It was very transformation for me. I took so much away from the experience. It helped me better define why I am here and how I can utilise my skill set & align it with my purpose to make the biggest impact possible.

Something within me has shifted. I uncovered the invisible boundaries I'd placed around myself, and the way I see the world has transformed. Discovering my true purpose—after 15 years of searching—brought clarity, freedom, and a deep resolve to stand for something greater than myself.
